Off-Site Hosted Storage Solution

When recording your IP cameras off-site to our remotely hosted servers in Fargo, ND, you will be required to have a high-speed Internet connection with matching upload and download speeds if possible. A static IP address is not required, but it is recommended for a more stable solution. Satellite Internet connections are not recommended when using our off-site hosting services due to the low upload speeds.

Recommended Broadband Speeds at the Camera Location

Number of Cameras	Download Speed	Upload Speed
1-2	384Kb	384Kb
3-4	512Kb	512Kb
5-6	768Kb	768Kb
7-8	1.5Mb	1.5Mb
9+	A Dedicated, Central or Managed Storage PC is required.	

Dedicated or Managed Storage Solution

If you choose to store the video on a Network Storage PC located where the cameras are to be installed, you are not required to have a high-speed Internet connection. This is only required if you wish to view the video and archives remotely from another location. A static IP address is recommended if you wish to have remote access to the system. A static IP address is required when choosing our Managed Storage Solution.

Recommended Broadband Speeds at the Camera Location for Remote Access

Number of Cameras	Download Speed	Upload Speed
1-9	384Kb	256Kb
10-19	512Kb	384Kb
20-29	768Kb	512Kb
30+	1.5Mb	768Kb

Central Storage Solution

You will be required to have a high-speed Internet connection at both the camera location and at the location where you want to host your Network Storage PC (Corporate Headquarters, at your home, etc.). A static IP address is recommended at the camera location. A static IP is required at the Network Storage PC location.

Recommended Broadband Speeds at the Camera Location: See chart for the Off-Site Hosted Storage Solution.

Recommended Broadband Speeds at the Network Storage PC Location: Please call byRemote, Inc. for a free consultation.
